

MySQL Queries Documentation

Query	Description / Usage
CREATE DATABASE mydb;	Creates a new database named 'mydb'.
USE mydb;	Selects the database 'mydb' for further operations.
CREATE TABLE employees (id INT PRIMARY KEY, name VARCHAR(50), age INT, salary DECIMAL(10, 2));	Creates a table named 'employees' with columns: ID, Name, Age, Salary.
INSERT INTO employees (id, name, age, salary) VALUES (1, 'John Doe', 30, 50000.00);	Inserts a record into the 'employees' table.
SELECT * FROM employees;	Fetches all records from the 'employees' table.
SELECT name, salary FROM employees WHERE age > 25;	Fetches names and salaries of employees older than 25.
UPDATE employees SET salary = 60000 WHERE id = 1;	Updates the salary of the employee with ID 1.
DELETE FROM employees WHERE id = 1;	Deletes the record of the employee with ID 1.
ALTER TABLE employees ADD department VARCHAR(50);	Adds a new column 'department' to the 'employees' table.
DROP TABLE employees;	Deletes the 'employees' table completely.
DROP DATABASE mydb;	Deletes the database 'mydb' completely.
SELECT department, COUNT(*) FROM employees GROUP BY department;	Groups employees by department and counts them.
SELECT e.name, d.dept_name FROM employees e INNER JOIN departments d ON e.dept_id = d.id;	Performs a JOIN operation between employees and departments tables.
CREATE INDEX idx_name ON employees(name);	Creates an index on the 'name' column to improve search speed.
DROP INDEX idx_name ON employees;	Drops the index 'idx_name' from the employees table.
CREATE VIEW high_salary AS SELECT * FROM employees WHERE salary > 50000;	Creates a View named 'high_salary' that shows employees with salary greater than 50000.
SELECT * FROM high_salary;	Fetches data from the 'high_salary' view.
GRANT ALL PRIVILEGES ON mydb.* TO 'user'@'localhost';	Grants all privileges on 'mydb' to a specific user.
REVOKE ALL PRIVILEGES ON mydb.* FROM 'user'@'localhost';	Revokes all privileges from a user on 'mydb'.
